

## server storage VM

**Server Virtualization** is the management of medical resources on the computer. For how many virtual machines are on the same machine with the name simulate those that Virtual Machine (VM), who said that many. The unit is located on the same computer, the machine VM also has a privacy (privacy) and independent of each other, such as the Windows version can be used to make such a Software Virtualization. The popular including VMware and Hyper-V VM, etc. Most often used as Windows or Linux.

The Virtualization it is linked to many parts of IT is now the subject of a **Server Virtualization. On either Intel or AMD CPU Only!!**

### Virtualization Work?

If we look at the components of the Hardware of the computer's CPU, RAM, Disk and Network in Figure 1 on the left to see the Operating System (OS) assuming that the OS is Windows while running on Windows to run the Hardware It relies. BIOS Allows the management to make Virtualization. It is like the extra middleman between Windows and BIOS in Figure 1, the right-hand named Hypervisor or some may call Virtual Machine Manager (VMM) in this system OS do I need to pass Hypervisor throughout (the Hypervisor devised by. Since the IBM Mainframe)

Virtualization Type – 1 Native (Bare metal)

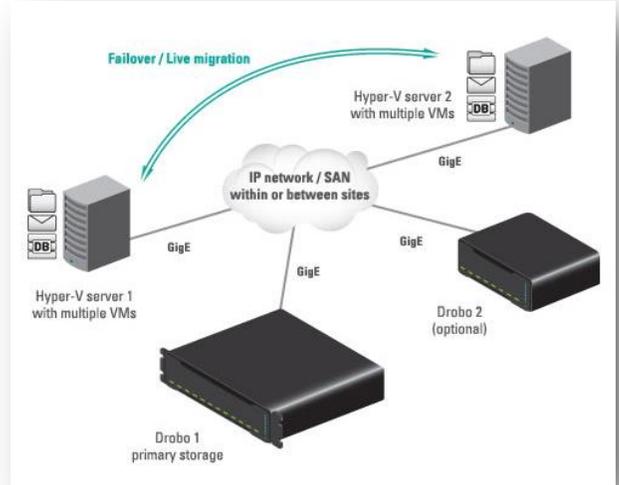

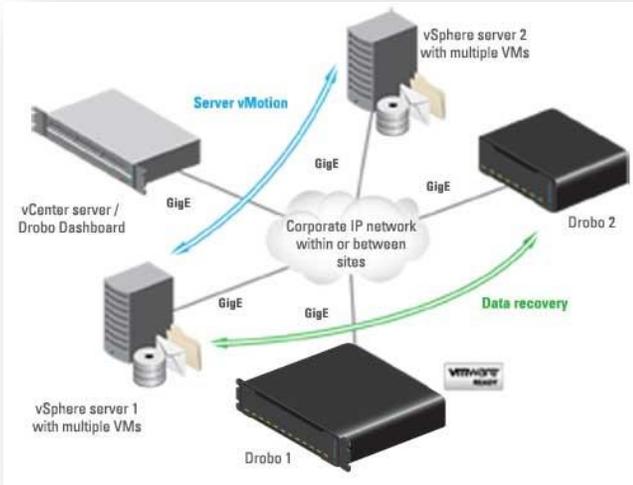

## **Benefits of Virtualization**

1. Versioning
2. Hardware not attached to
3. Easy Care
4. Take Advantage of Hardware more.
5. Reduce Costs
6. Reduce the time and delivered quickly.

## **Display Applications**

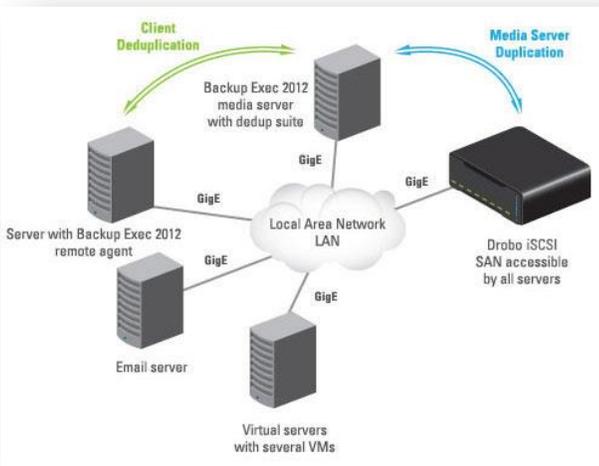

In the early days of Virtualization for Windows Guest OS are often used for application development. And system testing When the user confidence and the development of more advanced Hypervisor. Virtualization It is applied in Production and Critical Tier-1 Application.

I get descriptions country that VM can be implemented on a personal computer such cases, we would like to have Windows multiple is on us like some work, some play games etc adopted for a beginner, it would follow from vm360degree. Here

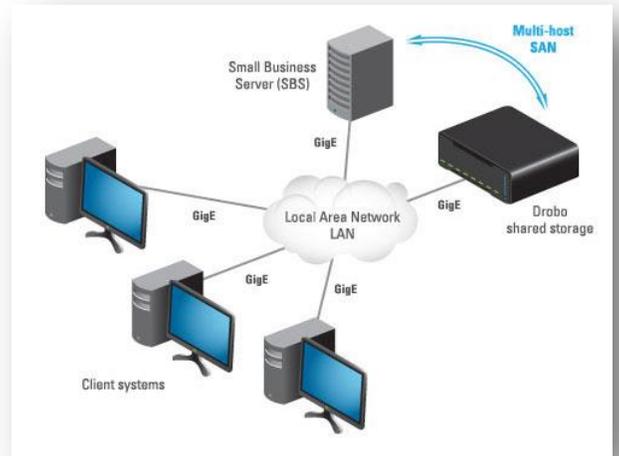

## Virtualization

VM HA Can Be Easy & Affordable for SMBs

Integrated Protection for Everything SMB IT

Storage for Small Business Server
